

1] Beringia, today, we use the term to describe a vast area between the Kolyma River in the Russian Far East to the Mackenzie River in the Northwest Territories of Canada

It is a region of worldwide significance for cultural and natural resources. This area also provides an unparalleled opportunity for a comprehensive study of the earth th--its unusually intact landforms and biological remains may reveal the character of past climates and the ebb and flow of earth forces at the continents'' edge

Beringia may hold solutions to puzzles about who the first people were to come to North America, how and when they traveled and how they survived under such harsh climatic conditions.

2] The last "ice age" occurred around 12-15,000 years ago.

3]The evidence for the bridge for several periods during the Pleistocene Ice Ages the trip could be made entirely on land instead of water and when there was water you could see people on small watercrafts.

4]The first people came from Asia.

5]The first visitors came not on there own, they just followed great herds of grazing mammals across the grassy tundra.

by: Michael .S. + Garrett .L. grade 5 St. Pius X Catholic School

Mike`s comments The website was great and it was fun to answer the questions and to read the facts. Also I did not like how you had to read so much to get the answers.

Garretts comments I also think the website was cool but then again I also did not like how u had to read the questions for ever until you found the answers.
